GMNG Stealth Structure (as originally envisioned)

Management Position Structure within GMNG (and its subsidiaries)

Researcher/Fellow

Project Manager Roles

Analyst/Consultant

Project Manager and Product Manager Roles

Associate/Director

Program Manager Roles

Manager/Director
of Honeycomb

Program Manager Roles and report directly to GMNG Admin Team ("Office of the CEO"). It is a requirement that all managers/directors maintain a **GMNG Index Score*** > 700.

Associate Partner

Members in Partnership-Track are non-voting members who are assessed quarterly using a proprietary hybrid model of RVUs (Relative Value Units) and GVUs (Green Value Units). The RVU/GVU output during the partnership-track determines the "buy-in" to become a shareholder of the company.

Partner

Voting member

***GMNG Index Score** (similar to how authors/researchers can measure their [impact-level](#) in the peer-reviewed academic community), GMNG members/subject matter experts are assessed on their impact in relation to [GMNG's 7 honeycombs](#) and their ability to *collaborate*, *innovate*, and ultimately create the "honey" to *heal*. The GMNG index score is calculated based on a proprietary algorithm that combines RVU/GVU productivity within GMNG. The score ranges from 0 to 999 and is updated on a quarterly basis.
